Characters Arrays & Strings

Array : fixed size

String : stream of characters
Every character can be accessed by index
Index : 0 to (size of string - 1)

String name = “A k a n k s h a” → size = 8
0 1 2 3 4 5 6 7 -> 7 = size - 1

// Size of string
Int n = name.size()
Int m = name.length()

Homework :
Task - 1 : write a program to Count the number of vowels in a string
Task - 2 : Write a program to check whether the string is palindrome or not
